Validation of *Fusionodes* JALOSZYŃSKI (Coleoptera: Scydmaenidae)

PAWEŁ JALOSZYŃSKI

Os. Wichrowe Wzgórze 22/13, 61-678 Poznań, email: japawel@man.poznan.pl

ABSTRACT. The genus-group name “*Fusionodes*” is recognized as an unavailable name due to lack of the type species designation, which was erroneously omitted in the original description. To render the name valid, *Cephennodes hippopotamus* JALOSZYŃSKI, 2007 is designated as the type species of *Fusionodes*, a subgenus of *Cephennodes* REITTER.

Key words: entomology, taxonomy, Scydmaenidae, *Cephennodes*, *Fusionodes*, type species designation.

Due to an author’s error, designation of the type species for the new subgenus *Fusionodes* has been omitted during rearrangements of the manuscript (JALOSZYŃSKI 2007). As a result, “*Fusionodes* JALOSZYŃSKI” was not an available name. The missing type species is designated herein, and the name *Fusionodes* becomes valid upon the publication of this corrigendum.

Genus *Cephennodes* REITTER **Subgenus *Fusionodes* JALOSZYŃSKI**

TYPE SPECIES DESIGNATION

Cephennodes hippopotamus JALOSZYŃSKI, 2007 is designated herein as the type species of *Fusionodes* (for diagnosis see JALOSZYŃSKI 2007, p. 71).
